There are two types of surgery, and a myringotomy is quicker option. The doctor will make a tiny incision in the ear drum, then suction out any fluid that's trapped in the middle ear. It seems counter-intuitive, but you actually want the incision to heal slowly. If the cut stays open long enough, the Eustachian tube swelling can go down to normal.

Most canker sores are round or oval with a white or yellow center and a red border. They form inside your mouth — on or under your tongue, inside your cheeks or lips, at the base of your gums, or on your soft palate. You might notice a tingling or burning sensation a day or two before the sores actually appear.
