Basic Surveying - Theory and Practice. Suppose the distance to be measured is an exact multiple (n) of 10 m. The optical path however, will be 2n x 10 m (this is the double distance). As the total path is 2n x 10 m, the total phase delay is n x 360°. Each 10 m wavelength represents a full 360° phase delay.

Cadastral surveying is the sub-field of cadastre and surveying that specialises in the establishment and re-establishment of real property boundaries. It is an important component of the legal creation of properties. A cadastral surveyor must apply both the spatial-measurement principles of general surveying...

### Cadastral surveying - Wikipedia

2 • Surveying has to do with the determination of the relative spatial location of points on or near the surface of the earth. • It is the art of measuring horizontal and vertical distances between objects, of measuring angles between lines, of determining the direction of lines, and of establishing points by predetermined angular and linear measurements.
